

State Integrated Land Records

Dave Gruenhagen
Idaho Department of Lands

History of IDL's Land Records

No Distribution

- ~1890-1973+: Cloth Plats were used to plat ownership and activities. Records were kept in file drawers.

Distribution on Microfilm cards

- 1973: IDL began the conversion of land records to stable Mylar plats and data-sheets.
- 1985: IDL began recording other state ownership.
- 1988: A conversion of Mylar data-sheet to a database.
- 1991: Cloth plat conversion was completed.
- 1993: Data-sheet conversion was completed.

Distribution via the Internet

- 2001: Internet distribution of land records (current system)
- 2003: Interactive mapping

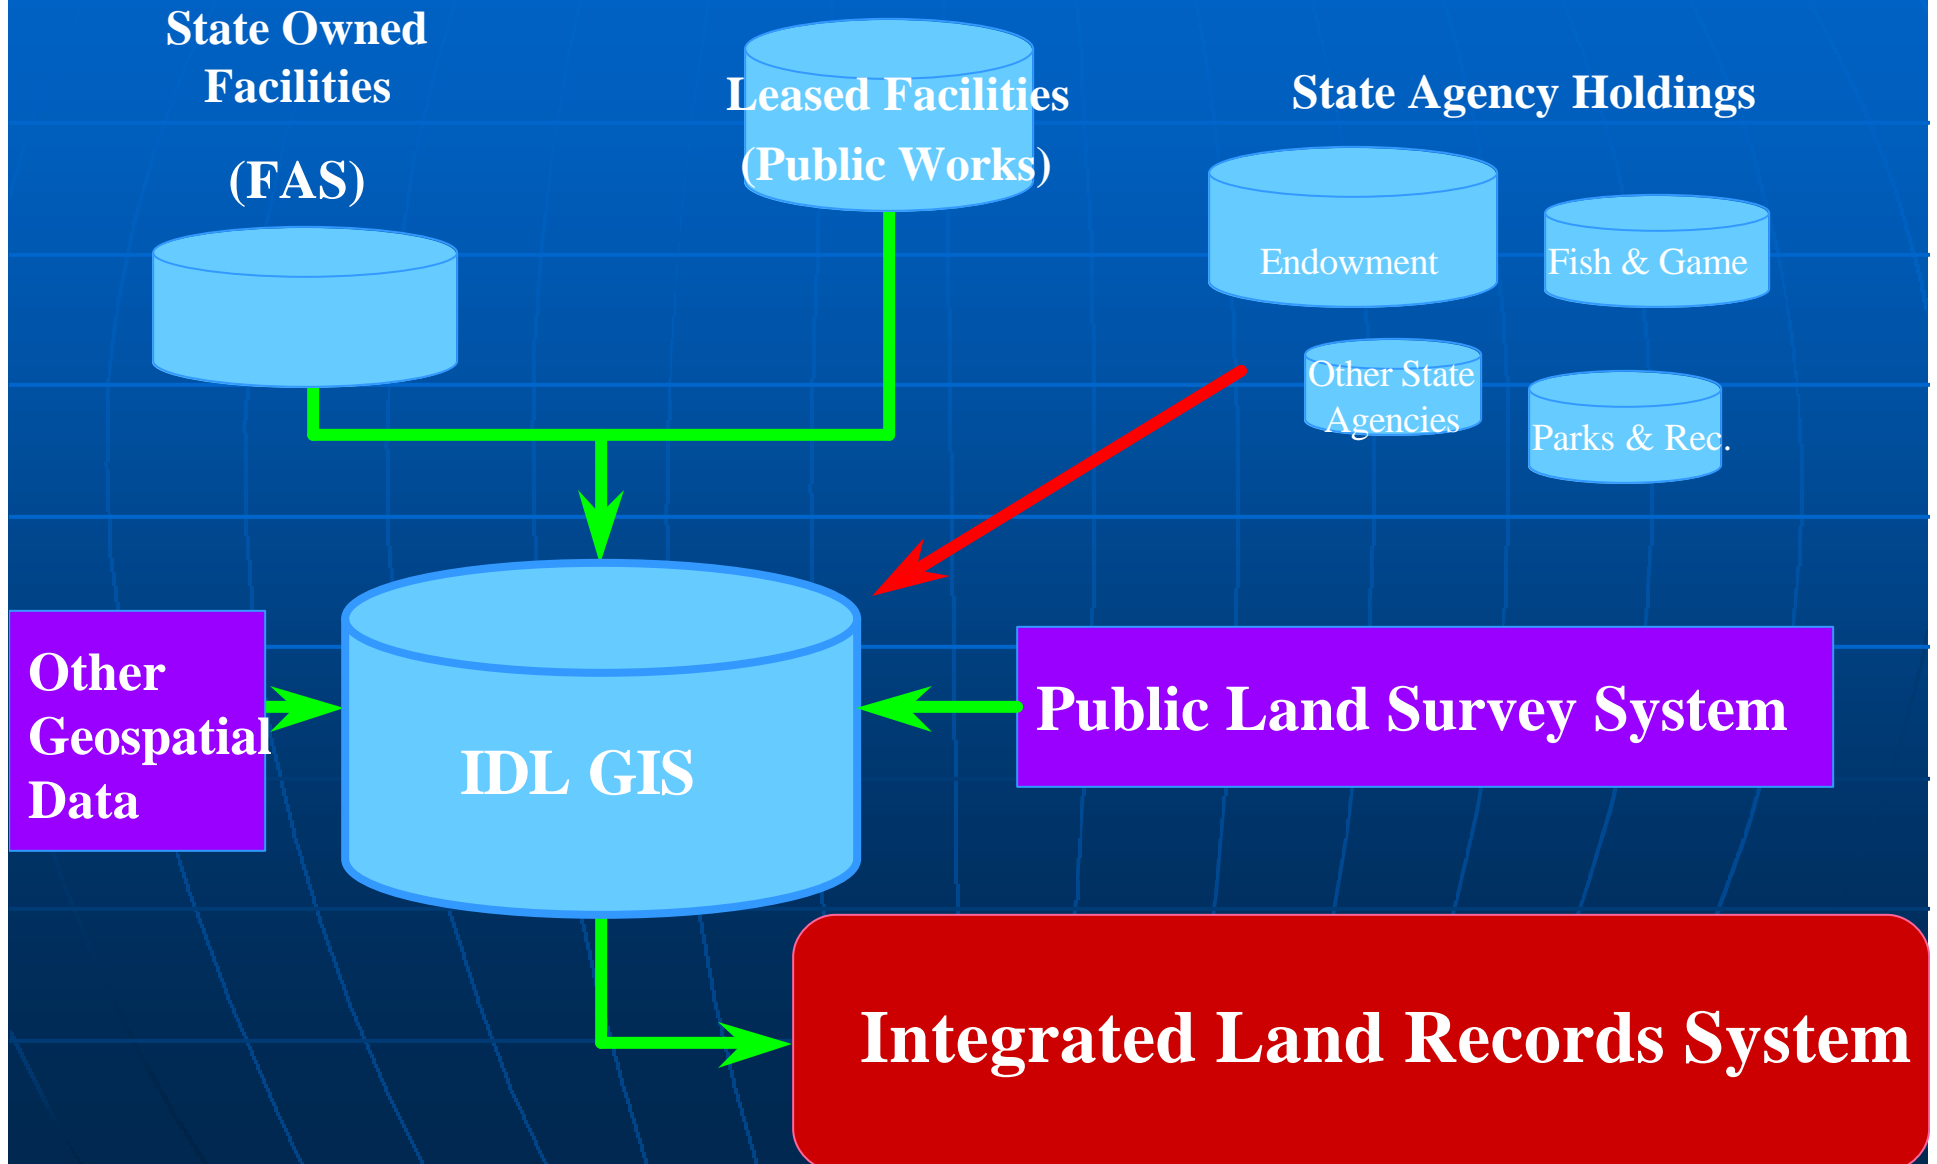

The Problem

There is no single point of contact for information relating to land and buildings owned and leased by Idaho State government.

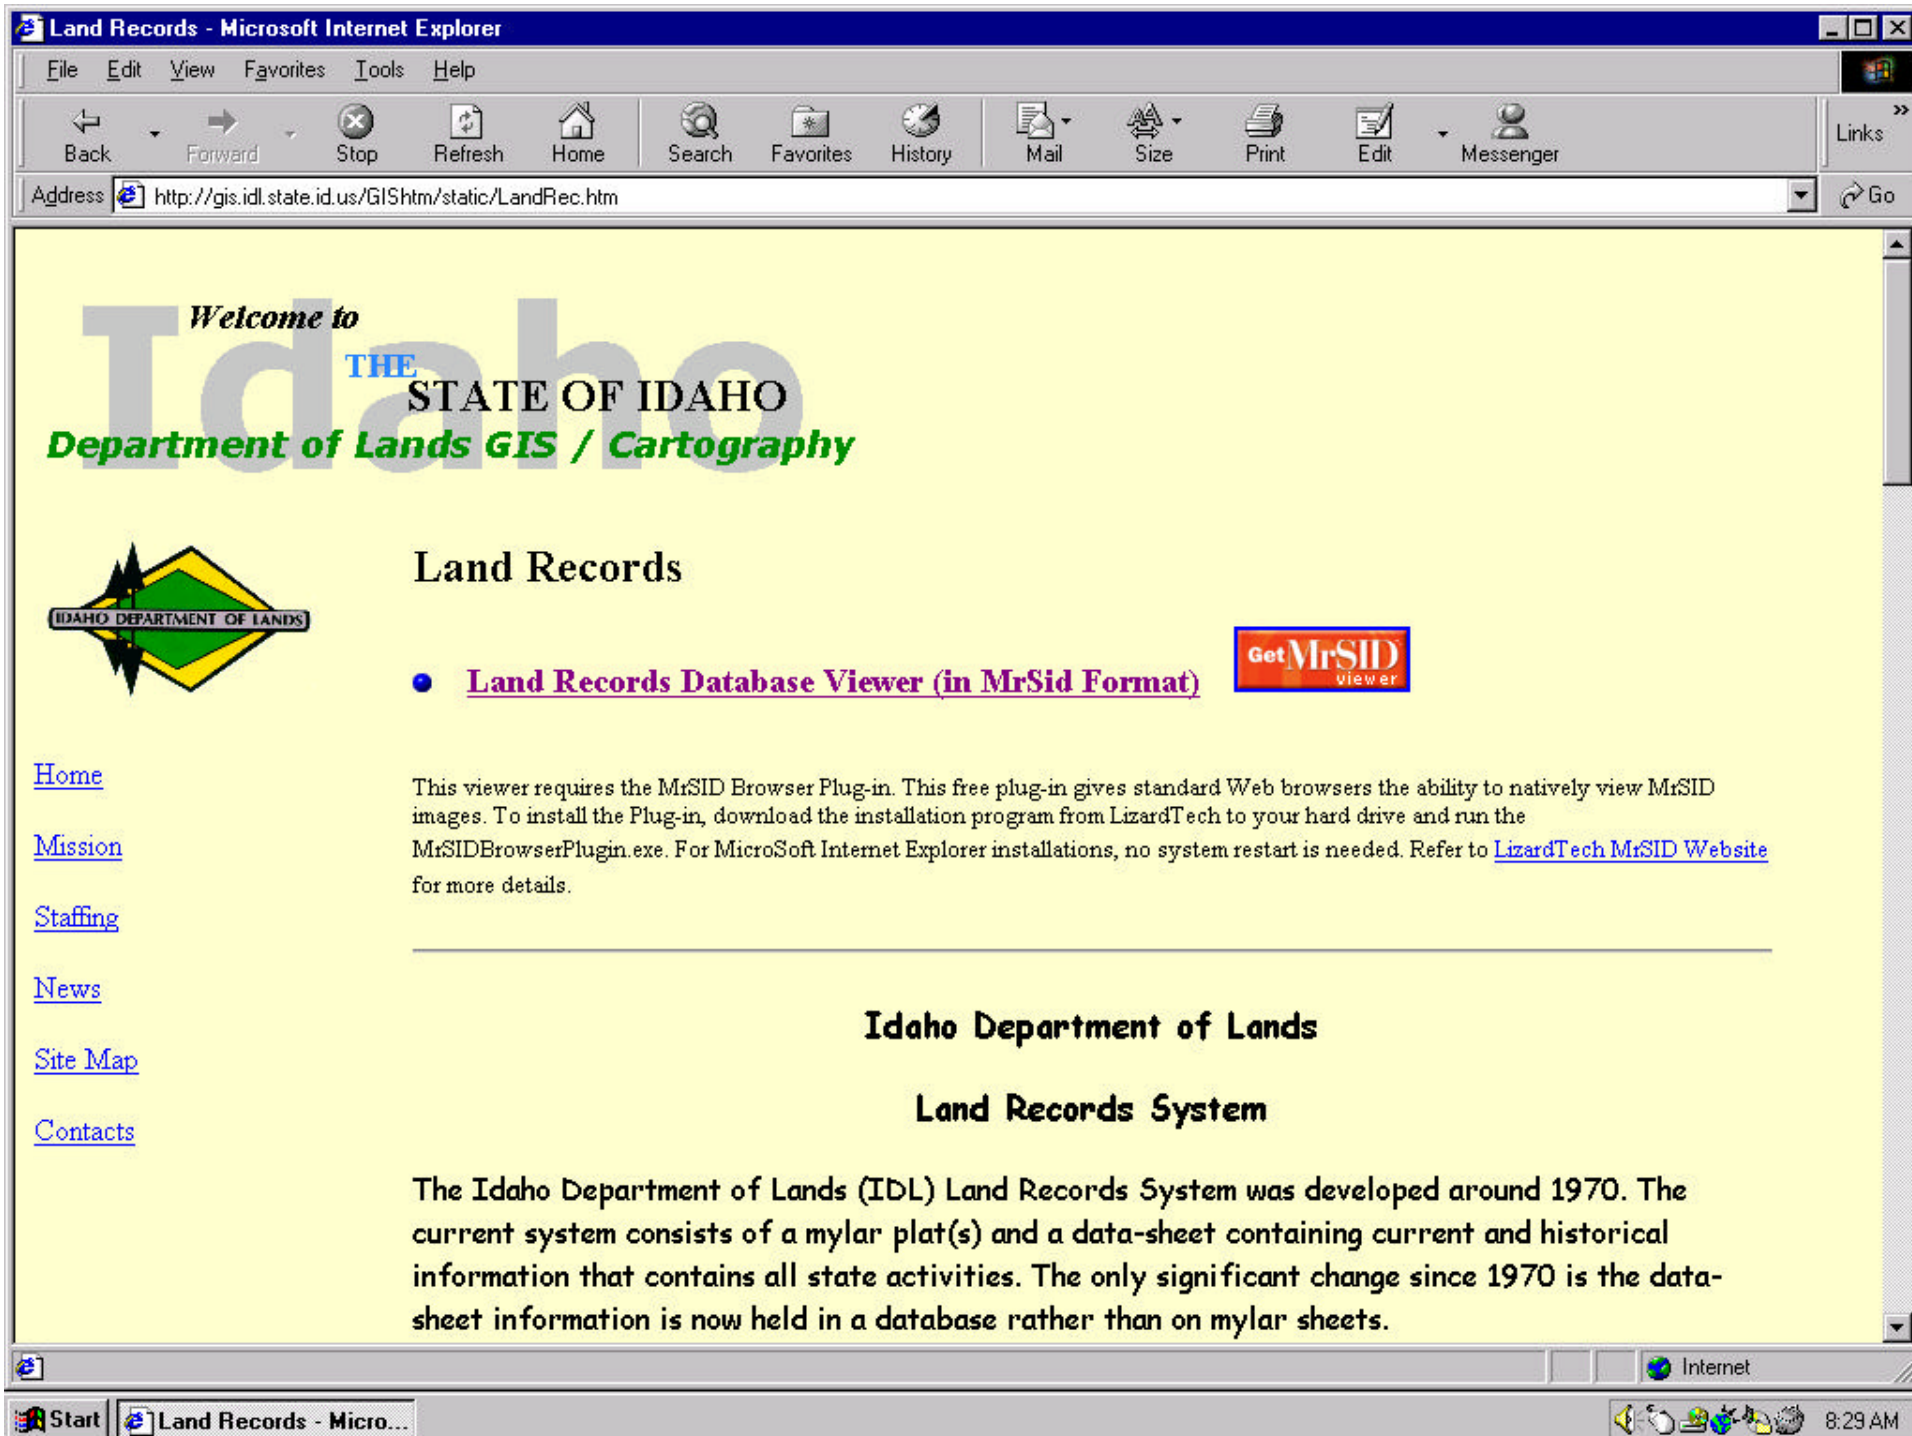

Legislation

Idaho Code 58-330: To provide that the Department of Lands shall maintain a database to centralize the deeds of all fee simple property and encumbrances that are owned by the state. To provide for state owned buildings to be integrated into the database and to provide for rules; and declaring an emergency.

Flow of Data

Idaho Dept of Lands GIS Plat Database

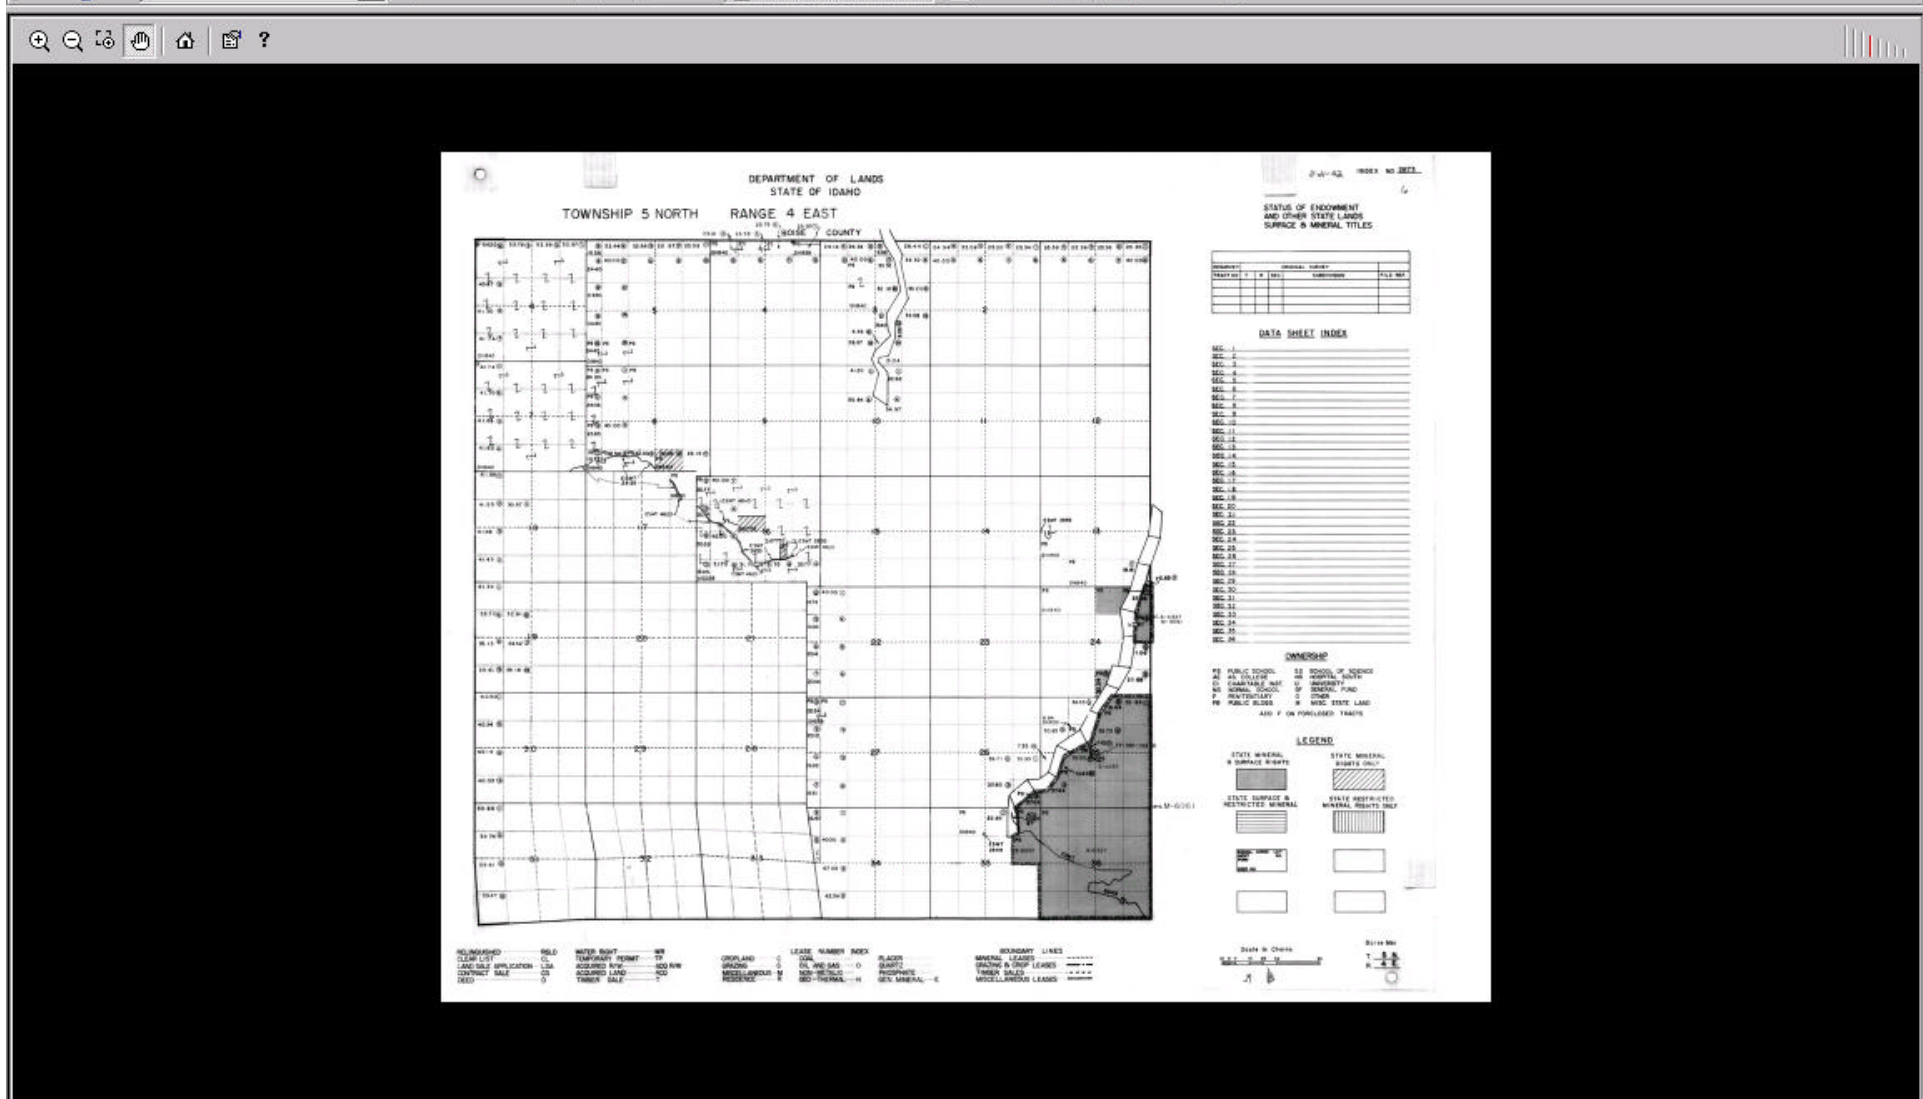

Map Scale Ratio 1 : 5,989,953

To locate a Plat or Quad first select the appropriate layer

Plats

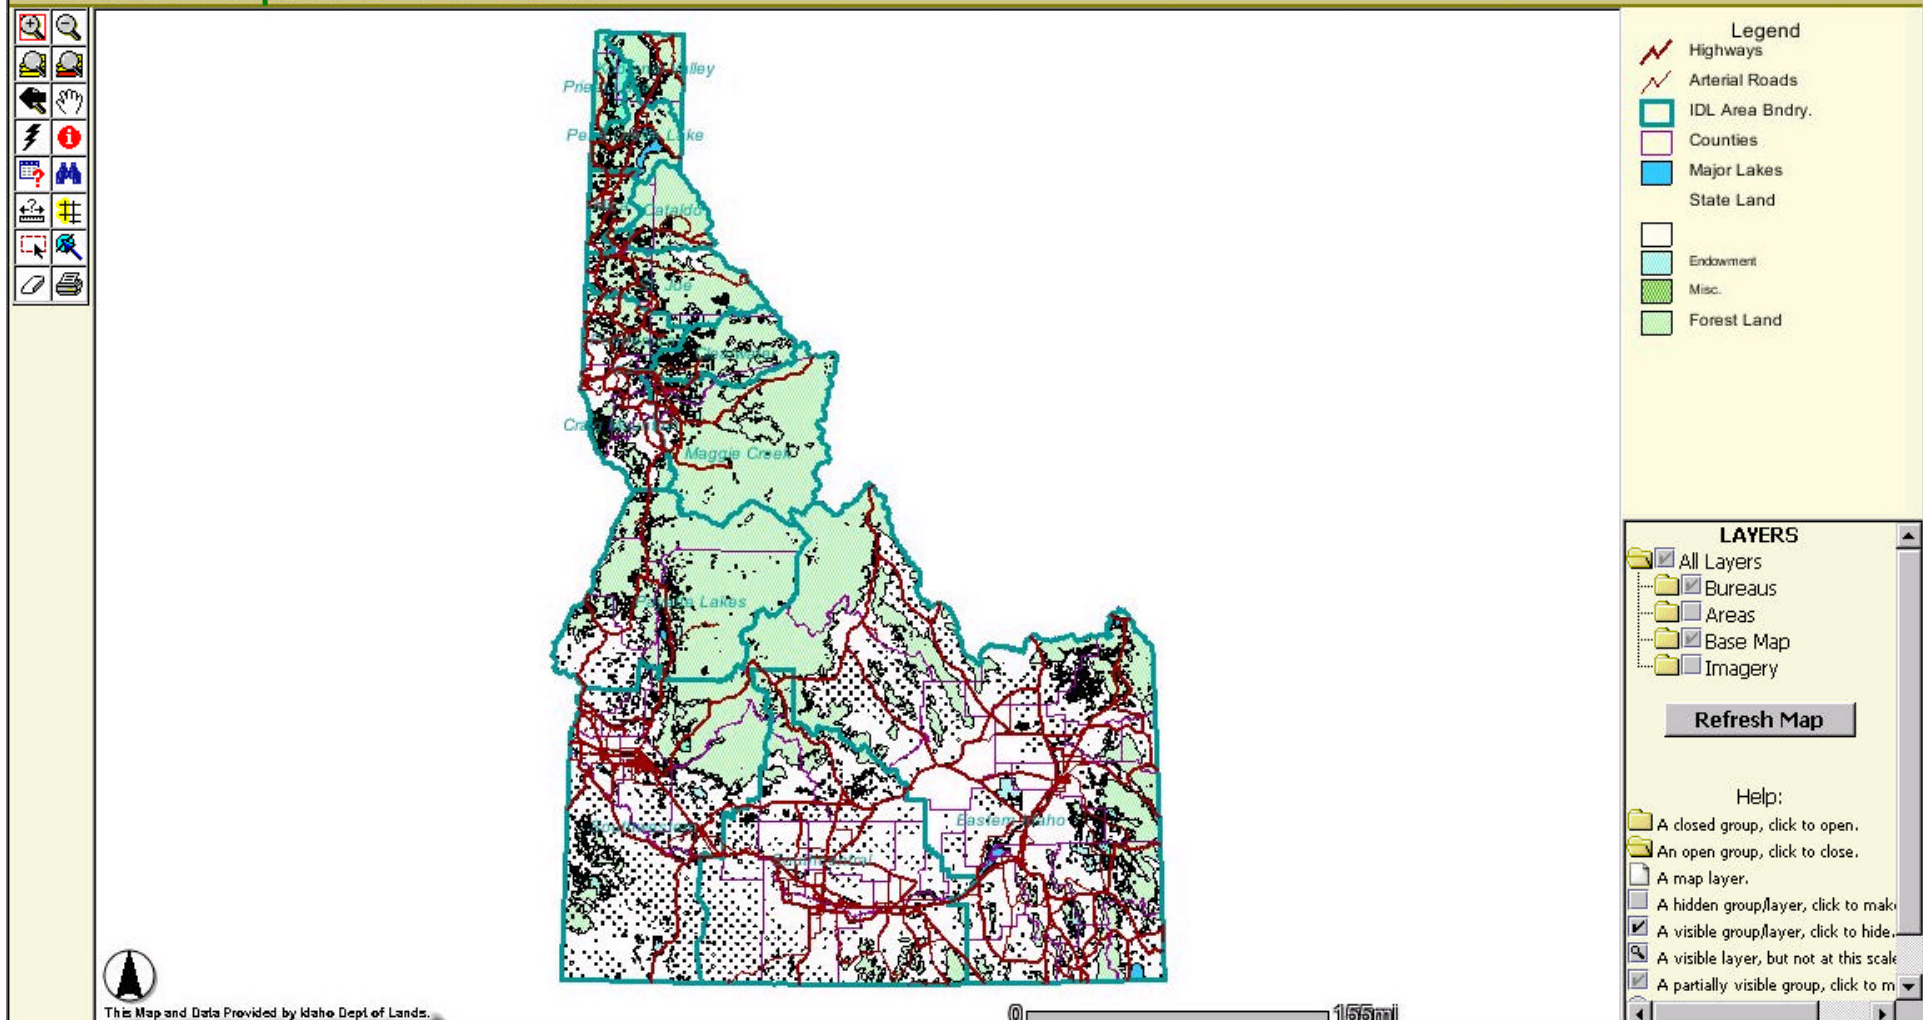

then select the **FIND BUTTON**  and enter
(ie, enter a township as t01n03e or quad name as soda peak)
